# **NETGEAR**<sup>\*</sup> Installation Guide

WG511v2 Wireless PC Card

### Follow These Quick Steps to Install Your WG511v2

These basic setup instructions assume that you will connect to a wireless access point or wireless router, and you are not using WEP security. Please refer to the online help and the Reference Manual on your CD for instructions on configuring WEP, Ad-hoc mode, or advanced options.

Estimated Completion Time: 5-15 minutes for each notebook PC.

## Windows XP Installation

#### 1. First, install the WG511v2 software.

- a. Power on your notebook, let the operating system boot up completely, and log in as needed.
- b. Insert the Resource CD for the WG511v2 into your CD-ROM drive. The CD main page shown below will load.

- c. Click the **Install Driver & Utility** link.
- d. Follow the InstallShield Wizard steps, and click Finish when done to restart your computer.

#### 2. NEXT, INSTALL THE WG511v2 WIRELESS PC CARD.

a. Hold the PC Card with the NETGEAR logo facing up and insert it into a CardBus slot. After a short delay, the Found New Hardware Wizard displays.

Note: If you have installed Windows XP Service Pack 2. click "Yes, this time only" or "Yes, now and every time I connect a device" to proceed.

If your hardware came with an installation Cl or floppy disk, insert it now.

Note: If a Windows XP logo testing warning appears, click **Continue Anyway** to proceed.

Next you will be prompted to enable the NETGEAR Smart Wireless Settings Utility configuration utility.

#### Click **Yes** to accept this option.

Or, choose No to enable Windows XP Zero configuration utility. You can switch between the utilities by going to Control Panel > Network Connections and clicking on your wireless network card. Click the Properties button and select the Wireless Networks tab. Check or clear the "Use Windows to configure my wireless network settings" check box.

#### Wireless Network Connection 23 Properties

General Wireless Networks Advanced

Use Windows to configure my wireless network settings

You will also be prompted to choose the country you are located in. Select your c. location from the list.

d.

#### 3. Now, configure your WG511v2 and save the Profile.

**Note:** The status bar at the bottom of the utility reports the speed of your connection. 54 Mbps speed is only possible when your wireless network has a 54 Mbps access point such as the NETGEAR WGR614 54 Mbps wireless router.

#### 4. FINALLY, VERIFY WIRELESS NETWORK CONNECTIVITY.

- с.

Note: If you are unable to connect, see the troubleshooting tips in the Installation chapter of the Reference Manual on the Resource CD.

a. Open the WG511v2 Smart Wireless Settings Utility by clicking on the icon in the Windows system tray.

The utility opens to the Settings tab page

b. Change the Network Name SSID to match your network.

Tip: To view the available wireless networks, use the drop-down list or the Networks tab and choose the one you want.

c. Click **Apply** to activate the connection.

Tip: Create work and home profiles. Then, activate whichever one you need for your current location.

a. Verify that the status monitor information at the bottom of the utility matches your wireless network.

b. Check the WG511v2 LEDs: Green (Link light): Blinking indicates the WG511 is trying to establish a connection but is unable to do so. Amber (Activity light): Blinking indicates the WG511v2 has a connection and is transmitting or receiving data.

Verify connectivity to the Internet or network resources.

### **Windows 2000, ME/98SE** Installation

- 1. FIRST. INSTALL THE WG511v2 SOFTWARE.
  - a. Power on your notebook, let the operating system boot up completely, and log in as needed.
  - b. Insert the Resource CD for the WG511v2 into your CD-ROM drive. The CD main page shown below will load.

- c. Click the Install Driver & Utility link.
- Follow the InstallShield Wizard steps, click **Finish** when done, and if prompted, restart your computer.
- 2. NEXT, INSTALL THE WG511v2 WIRELESS PC CARD.
  - a. Hold the PC Card with the NETGEAR logo facing up and insert it into a CardBus slot. After a short delay, the Found New Hardware Wizard displays.

Note: If Windows 2000 displays a Digital Signature Not Found warning, click Yes to continue the installation.

- b.
  - data.
- c.
